Summary

Experienced Sr. Software Developer with Proficiency in Frontend and Backend Technologies, ReactJS, NodeJS and AWS EC2

Experience

Senior Software Engineer

Java R&D Pvt. Ltd.

Oct 2021 - May 2023 (1 year 8 months)

Worked in a team that developed the frontend of an e-commerce platform using React and implemented a micro frontend architecture using MERN stack.

- Utilized technologies such as MUI, Node JS, Webworker, webpack, and wrote test cases in JEST library.
- MUI was used for building the UI components, while Node JS helped to develop the backend logic
- Webpack was used for bundling the frontend code, and tests were used for ensuring quality assurance
- Utilized Agile methodology for development, which involved daily scrum calls to ensure collaboration and communication between the team
- Chose these technologies based on their compatibility with MERN stack and their ability to facilitate efficient and scalable development of the ecommerce platform

Senior Software Engineer

XONIK

Sep 2017 - Sep 2017 (1 month)

Responsibilities included managing projects across various businesses, leading React development, and consulting with clients on projects, using MERN Stack, wordpress, & Firebase.

- Developed and hosted blogging, ecommerce, and listing websites on different cloud platforms
- Created and maintained Xonik's cloud infrastructure and implemented security policies, SSL, HTTPS, and CDN for the blogging network
- Managed a team of developers and had daily meetings with content, design, and development teams
- Implemented Agile methodology for workflow and had daily scrum meetings with different teams
